SMART HAND SANITIZERS

PRODUCT CATALOG

Solar Hand Sanitizers

New series of elements for small hand disinfection infrastructure in public places.

Solar Hand Sanitizer BASIC

Designed to meet the need to increase hygiene in public and office spaces. Now is the time to change habits and beyond masks, hand disinfection is the key to maintain the safety of people. As always at SEEDiA, we have focused on unique design, that will make the places that matter to us more attractive by elements of small architecture.

RAL 9005

Solar Hand Sanitizer BASIC

The highest quality materials and advanced technology make the product supplied unique. The Hand Sanitizer Dispenser can be powered by solar energy when it is working outdoor. It has an automatic disinfectant dispenser equipped with a sensor that automatically activates when your hands are placed under the dosing nozzle with the correct amount of liquid. Thanks to the communication with the cloud, the device collects and automatically transmit the information about the amount of liquid in the bottle, which allows keeping the tank always filled.

Solar Hand Sanitizer BASIC +

Slightly wider than BASIC, it has two disinfection nozzles, allowing easier access and more users to use. Especially useful in the most attended areas.

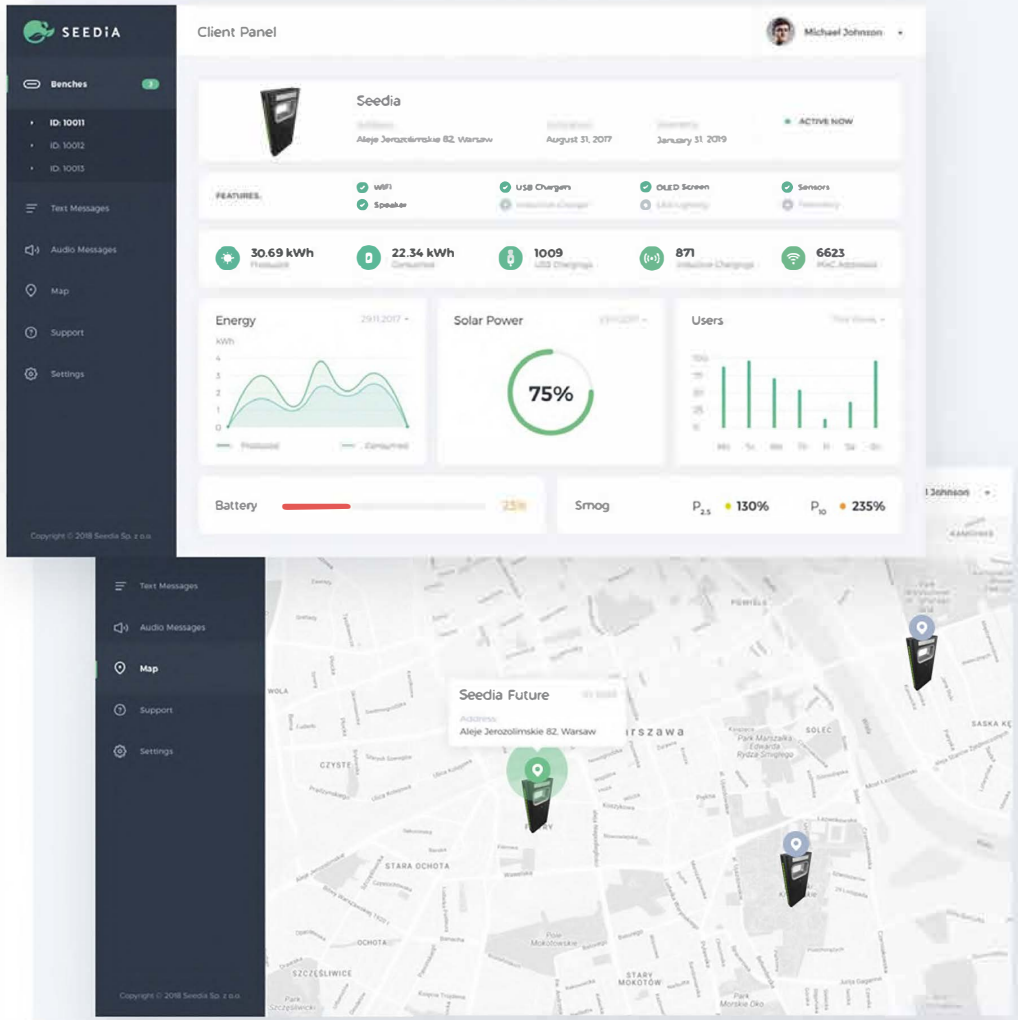
Seedia Dashboard

Each product of SEEDiA's brand sends data to specially designed web dashboard. Thanks to the obtained information, we are able to provide predictive maintenance for customers by remote supervision of every device.

By logging to the dashboard, the customer has a preview of the condition of the product in real time and possibility to manage multimedia functions of the device:

- mp3 player (remote creation of an audio library)
- e-paper screen (management of presented content)
- sensors (preview of data from sensors in real time)



Social WiFi Dashboard

Captive Portal

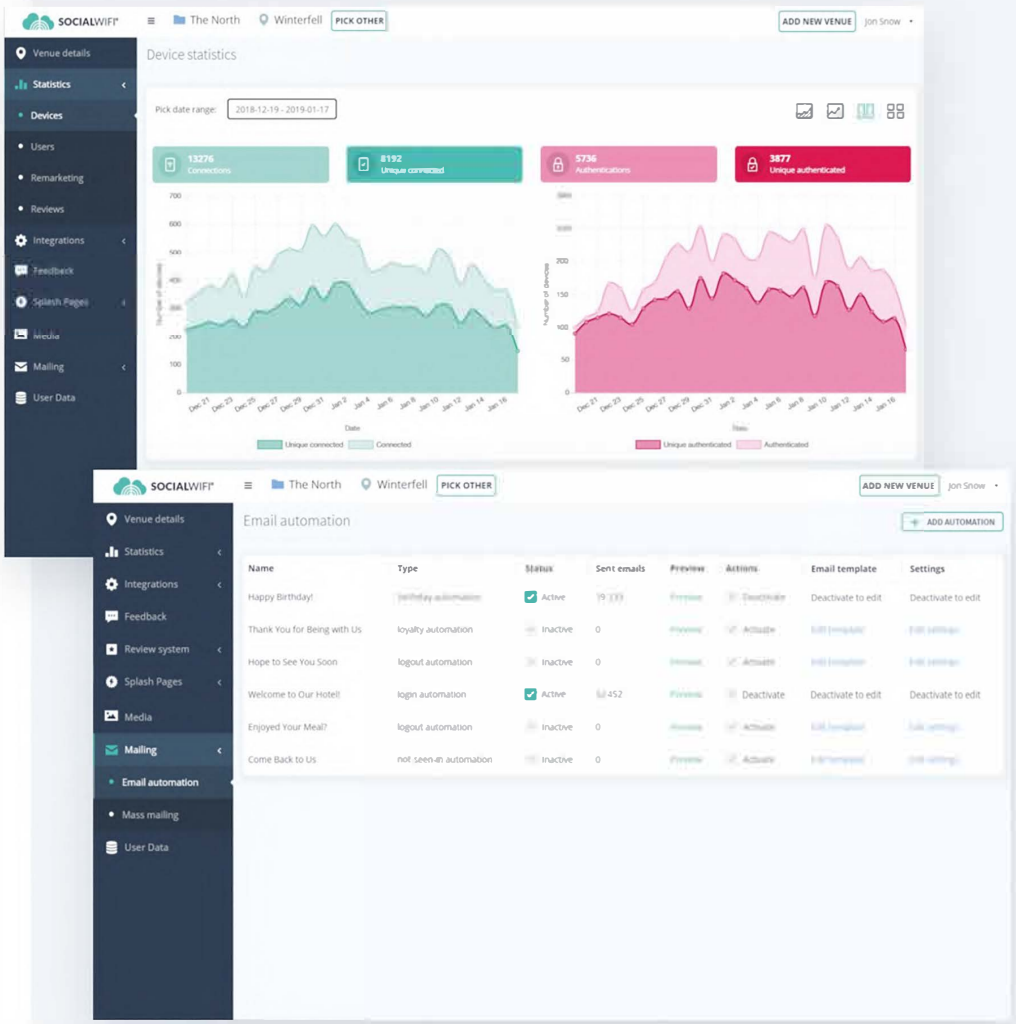
Our captive portal allows you gather all the data you need in order to properly communicate with your customers and personalize their experience.

Splash Page

Display any sort of content to your visitors, allowing them to easily learn more about your business, latest events or promotions and offers.

Reviews

Ask your customers for reviews, receive ratings and comments and communicate with your visitors.

Analytics


Analytics are a crucial component of Social WiFi. Getting to know who your customers are and how to best approach them is vital to any line of business.
